

## ASSET AUDIT

AS AN OPERATOR OF PV AND WIND FARMS, YOU ENTRUST SERVICE PROVIDERS WITH MANY OF YOUR OPERATIONAL DUTIES. THESE INCLUDE INSPECTIONS IN ACCORDANCE WITH DGUV V3, CHECKS OF SECURITY FACILITIES, EXPERT INSPECTIONS AND MAINTENANCE BY THE O&M SERVICE PROVIDER.

The legislator does not release the operator from their responsibility to perform regular audits of outsourced duties.

More than twenty years of experience in the technical management of wind and solar farms have given us the knowledge required to reliably assess whether an operator can rely on its service providers or if there is a need for improvement.

### REVIEW OF LEGAL DUTIES OF CARE

- Compliance with inspections in accordance with DGUV V3
- Inspection of security facilities
- Check that the necessary expert inspections are being performed
- Check that the necessary maintenance is being performed

Particular attention will be paid to compliance with legally prescribed and contractually agreed deadlines.

### IN-DEPTH INSPECTIONS

The asset audit can be supplemented by an evaluation of the contractual services owed by the technical operator:

- Agreed contractual obligations
- Failure messages in the event of stoppages
- Completeness of the operating data stored
- Recommendations for action in the event of operational anomalies

- Quality of the audit of accounts
- Quality of the documentation of fault rectification, maintenance and modernization measures

### FACILITY INSPECTION

In addition, rpc offers independent facility inspections. Inspections will focus on whether operation is permit-compliant and whether current norms and guidelines are being observed.

### OUR RANGE OF SERVICES

Comprehensive report:

- Description of target/actual status
- List of structural deficiencies
- Determination of contractual penalties
- Recommendations for action

This can be supplemented by assistance in fault rectification, and the resolution and harmonisation of outstanding issues with service providers.

### YOUR BENEFITS

- Objective assessment of the quality of services provided
- Reduction of liability risk
- Increasing the quality of the services provided
- Well-founded basis for discussion of revisions to contracts
