ABOUT US

renerco plan consult provides planning, consulting and assessment services for renewable energy projects across Germany and Europe. Our expertise covers wind energy, photovoltaics, grid connection and decentralized energy solutions. renerco plan consult is also accredited as a wind expert in accordance with DIN EN ISO/IEC 17025:2005.

In the photovoltaic sector, renerco plan consult supports clients with the planning of solar farms and rooftop PV systems, the preparation of yield assessments, technical due diligence, performance analysis and operational optimization.

Our clients include energy suppliers, public utilities, institutional investors, banks, project developers, citizen energy initiatives and cooperatives.

AGENDA

- Principles of photovoltaics and PV applications
- Overview of main components
- Energy yield estimation
- Project process and schedule
- Quality assurance
- Market developments
- Costs and revenues
- Typical technical faults

SETTING

Duration: 4 hours. The presentation and slides are in English. Separate dates for German-speaking participants can be arranged on request — please contact us for details.

This seminar will be held online via Microsoft Teams.

We also contribute as speakers to seminars organized by the German Wind Energy Association (BWE). Based on this experience, we can offer tailored seminars on grid access, site assessment and wind farm planning. Interested? Please let us know.
