ABOUT US

renerco plan consult is active in the planning, consulting and assessment of projects in the field of renewable energies. We work on projects in Germany and Europe with a focus on wind energy, photovoltaics, grid connection as well as decentralized energy use. renerco plan consult is also accredited wind expert according DIN EN ISO/IEC 17025:2018.

In the wind energy sector, we plan wind farms for our clients, carry out wind measurements and prepare yield and emission reports. Further services include feasibility studies, technical due diligence, asset audits and operational optimization.

Our clients are energy suppliers, public utilities, institutional investors, banks, project developers and energy cooperatives.

AGENDA

- market overview
- wind resources
- energy yield and yield assessment
- wind turbine and balance of plant
- financial and contractual framework
- tariff schemes / renumeration

SETTING

Duration: 4 hours. The presentation and slides are in English. Separate dates for German-speaking participants can be arranged on request — please contact us for details.

This seminar will be held online via Microsoft Teams.

We also contribute as speakers to seminars organized by the German Wind Energy Association (BWE). Based on this experience, we can offer tailored seminars on grid access, site assessment and wind farm planning. Interested? Please let us know.
