ABOUT US

renerco plan consult is active in the planning, consulting and assessment of projects in the field of renewable energies. We work on projects in Germany and Europe with a focus on wind energy, photovoltaics, grid connection as well as decentralized energy use. renerco plan consult is also accredited wind expert according DIN EN ISO/IEC 17025:2005.

In the photovoltaic sector, renerco plan consult plans solar farms and roof tops and prepares yield reports. Further key aspects are due diligence and operational optimization.

Customers are energy suppliers, public utilities, institutional investors, banks, project developers, citizen energies and cooperatives.

AGENDA

- principles of photovoltaics and PV applications
- overview of the main components
- energy yield estimation
- project process and schedule
- quality assurance
- market developments
- costs and revenues
- typical technical faults

SETTING

Duration: 4 hours. Presentation and slides are in English. It is possible to offer separate dates for German speakers only – please contact us!

This is a web seminar – please join us via Microsoft Teams

We are also active as speakers at seminars of the German Wind Energy Association (BWE). Based on this we can offer individual seminars on the topics of grid access, site assessment and wind farm planning. Interested? Just let us know.
