renerco plan consult GmbH

Ganghoferstr. 66 | 80339 München

www.renercoplanconsult.com

ABOUT US

renerco plan consult is active in the planning, consulting and assessment of projects in the field of renewable energies. We work on projects in Germany and Europe with a focus on wind energy, photovoltaics, grid connection as well as decentralized energy use.

renerco plan consult is also accredited wind expert according DIN EN ISO/IEC 17025:2018.

In the wind energy sector, we plan wind farms for our clients, carry out wind measurements and prepare yield and emission reports. Further services include due diligence, asset audits and operational optimization.

Our Customers are energy suppliers, public utilities, institutional investors, asset managers, banks, project developers and energy cooperatives.

AGENDA

- market overview
- wind resources
- energy yield and yield assessment
- wind turbine and balance of plant
- financial framework
- tariff schemes/renumeration
- Introduction to Offshore Wind

SETTING

Duration: 4 hours. Presentation and slides are in English. It is possible to offer separate dates for German speakers only – pls. contact us!

This is a web seminar – pls. join us via Microsoft Teams

We are also active as speakers at seminars of the German Wind Energy Association (BWE). Based on this we can offer individual seminars on the topics of grid access, site assessment and wind farm planning. Interested? Just let us know.
