ABOUT US

renerco plan consult is active in the planning, consulting and assessment of projects in the field of renewable energies. We work on projects in Germany and Europe with a focus on wind energy, photovoltaics, grid connection as well as decentralized energy use.

renerco plan consult is also accredited wind expert according DIN EN ISO/IEC 17025:2018.

In the grid area we offer consulting and planning services for our clients, e.g. electrical planning of grid infrastructure or the optimization of existing grid access points.

Internally, we work for BayWa r.e. companies on both the wind and PV side in Germany but also world-wide. Externally, our customers are energy suppliers, public utilities, institutional investors, asset managers, banks, project developers and energy cooperatives.

AGENDA

- Electrical design of the grid connection
- Grid connecting process – what to do and when?
- Insights into the technology - which electrical infrastructure is important?
- Cable route planning, construction and commissioning
- Optimization of the assigned grid connection point
- Best practice in grid connection – what do you need to consider?
- Economic aspects

SETTING

Duration: 3 hours. Presentation and slides are in German. It is possible to offer separate dates for English speakers only – pls. contact us!

This is a web seminar – pls. join us via Microsoft Teams

We are also active as speakers at seminars of the German Wind Energy Association (BWE). Based on this we can offer individual seminars on the topics of grid access, site assessment and wind farm planning. Interested? Just let us know.
